LAST UPDATED

22 November 2013
INTRODUCTION

The availability of logs and the emphasis of relevant moments in a video are often crucial for editing in post-production. When working with lengthy video feeds, editors are required to wait for streams to be completed prior to accessing logs. This may be time-consuming which is unnecessary.

IPLog2Post removes this constraint.

IPLog2Post is indeed a solution that intends to instantly provide NLE editors with information about the IPDirector IPLLogger session: operations of logs (create, update and delete) and log sheets (create, update, link/unlink to media and publish/unpublish).
1) Streaming to Avid storage is scheduled in IPDirector and linked to IPLogger log sheet.
2) Ingested streams are performed alongside logging sessions.
3) Media is streamed to Avid storage and referenced in Avid Interplay.
4) XTAccess/Xsquare provides the system information about media streamed to Avid storage.
5) IPLog2Post system receives information from IPLogger logging session.
6) IPLog2Post system receives information from media that was streamed to Avid Storage.
7) IPLog2Post system submits information to Avid Interplay about IPLogger logging session.
FEATURES

- Logging session information available in NLE:
  - log operations: new, update, delete
  - log sheet operations: link to media, unlink from media and relink to another media, update, delete and publish/unpublish.
- IPDirector user credentials during logging sessions
- Every log session action is instantly available in Avid Interplay
- Database redundancy available (SQL Server mandatory)
- Possibility to work with dedicated Avid Interplay Web Server

MONITORING INTERFACE
RESTRICTIONS

- The product works only with Avid Interplay, not Avid standalone nor FCP nor Adobe
- No application/service redundancy
- No log of last video frame (Avid Restriction)
- Time to insert logs in Avid Interplay database increases as the number of logs related to media increases (This is an Avid Restriction)

SYSTEM REQUIREMENTS

HARDWARE

- EVS XTAccess / EVS DB Hardware (relative to setup dimensions).

SOFTWARE

- .Net 4.0
- SQL Server Express+ 2005/2008
- IPDirector 6.05.60+
- XTA 1.18+
- Notification Center 2.1.6+
- Avid Interplay 2.4+

LICENSE

- XSecure protected.
CUSTOMER SUPPORT & TRAINING

Our clients range from TV stations to video equipment rental companies and production houses worldwide. EVS’ key priority is to make sure that its clients keep performing at the highest possible level. We listen to our customers, identify operating workflows, anticipate needs, and suggest effective and reliable solutions, so that they in turn can offer top-quality productions to millions of TV viewers across the globe.

CUSTOMER SUPPORT

EVS is dedicated to making sure its products are functioning in a way that meets your needs and expectations. We offer technical support 24/7 from each of our regional offices, so you can rest assured that someone will always be available to answer any question that may arise.

All members of EVS’ technical support team are qualified technicians with a solid background in broadcasting. They understand your requirements and can provide you with the best solution available.

TRAINING

Do you want to learn how to operate EVS systems and applications or enhance your skills in using our tools?

EVS Training offers a series of courses on how to operate its products, taught in-house by industry professionals. Some of the training sessions are conducted by the EVS team via a Web interface, so that you get hands-on instruction even at a distance. EVS User Guides and technical documents are available free-of-charge on our Website.
