INTRODUCTION

Running on iPad, IPNotes is an on-the-go logging application that integrates with IPDirector through XML import and export. The goal is to easily allow logging an event through an iPad App, from several users, and to send back all log sheets to an IPDirector following the event.

Users can prepare their work prior to leaving the facility by importing keyword grids and preparing log sheets to their iPad. They can then go in the field with the ability to log anything from an interview to a sporting event.

Once logging is completed, the log sheet is exported in XML from the iPad and can be reimported to IPDirector. Contributions from several loggers are concatenated in a single log sheet.
WHY DO WE NEED IPNOTES?

Until now, it was impossible to log while out in the field. IPNotes is an easy and affordable way of logging while in the field with touchscreen facilities. It is possible to log with free text, keywords and interest level.

TYPICAL WORKFLOW DESCRIPTION

Logging is executed with time of day or with the iPad connected to a TC of an external device (ENG camera) using a timecode cable.

Once completed, it is possible to export resulting log sheets to IPDirector and reconcile manually with media.

Several people can contribute to the same log sheet. The logs will be aggregated later during import in IPDirector.

During the second phase, it will be possible to export logs in real time with an IPDirector setup.
INTERFACE

The interface is easily customizable: rearranging or resizing panes, hiding and revealing them, naming, changing colours is as simple as in common iPad applications.
CUSTOMER SUPPORT & TRAINING

Our clients range from TV stations to video equipment rental companies and production houses worldwide. EVS’ key priority is to make sure that its clients keep performing at the highest possible level. We listen to our customers, identify operating workflows, anticipate needs, and suggest effective and reliable solutions, so that they in turn can offer top-quality productions to millions of TV viewers across the globe.

CUSTOMER SUPPORT

EVS is dedicated to making sure its products are functioning in a way that meets your needs and expectations. We offer technical support 24/7 from each of our regional offices, so you can rest assured that someone will always be available to answer any question that may arise.

All members of EVS’ technical support team are qualified technicians with a solid background in broadcasting. They understand your requirements and can provide you with the best solution available.

TRAINING

Do you want to learn how to operate EVS systems and applications or enhance your skills in using our tools?

EVS Training offers a series of courses on how to operate its products, taught in-house by industry professionals. Some of the training sessions are conducted by the EVS team via a Web interface, so that you get hands-on instruction even at a distance. EVS User Guides and technical documents are available free-of-charge on our Website.
