

Epsio FX

SPECIAL VIDEO EFFECTS
A TOUCH AWAY

**EPSIO
MODULE**

BIG EFFECTS IN A SMALL PACKAGE

Imagine adding effects to live video footage as easily as tapping a screen. No post production, training or waiting required. Get ready, because that's what you'll get with Epsio FX.

Epsio FX comes loaded with special effects, allowing you to quickly and easily add effects to **your playlist in order to create sophisticated highlights.**

Working in conjunction with the LSM and LSM Connect, The Epsio FX eliminates complex post production video effects processes and delivers fast, worry-free special effects.

BIG EFFECTS

PICK YOUR EFFECT, EPSIO DOES THE REST

With Epsio FX, you have immediate access to sophisticated live effects while saving post-production costs and potential headaches. Add artistic replay effects, highlights enhancements and craft a story for viewers by inputting simple parameters.

There are two types of effects:

- Clip effects: Apply an effect to any clip of the playlist. Effects are grouped by categories:
 - Coloring effects
 - Artistic effects
 - Overlay (still or animation)
 - Film & TV look
- Transition effects: import your own image sequence and use it as a replay wipe on top of all transition in the Playlist.

It's all just a touch away: colour correction, adjusting contrast, luminosity and saturation, adding graphic overlays, or adding a box frame, letter or pillar box. You can also apply digital filters to transform the look and mood of imagery, similar to effects used in popular TV programming and web-based consumer photography sites.

Trailers and promos can now be created in the OB van without having to rely on post production in an edit suite, saving time and cost. Epsio FX helps you enrich live content with solutions that save costs and speed up workflows. Let us show you how.

REVEAL MODE

Ramp up your storytelling with synchronized external data

The newest addition to the Epsio FX module, Epsio Reveal allows you to integrate synchronized data with your replays for more informative and compelling action.

Imagine this scenario:

The clock is winding down in a close basketball game, the player shoots and scores - after the buzzer. The only valid proof that the ball left the shooter's hand before the clock ran out is the time display. With Epsio Reveal, you can accurately broadcast the time on the first replay, moving back and forth to show the exact moment when the ball left the player's hand.

Alongside LSM and LSM Connect, add dimension to replays. Verify any measurable sports event.

With Epsio Reveal, it's your call.

CUSTOMER SUPPORT & TRAINING

Our clients range from TV stations and rights owners to video equipment providers and production houses worldwide. We listen, analyse existing workflows, anticipate customer needs, and implement effective, highly reliable solutions. Enabling our customers to provide top-quality TV programming and enriched content to millions of viewers across the globe is our top priority.

CUSTOMER SUPPORT

Our products should function in ways that meet your specific needs and expectations - every minute of every day. That's why our technical support is always on, 24/7 from each of our regional offices. Someone is always available to answer any question, large or small.

Every person in EVS' technical support team is a qualified technician with a solid background in broadcasting. They understand your requirements and will work tirelessly to answer your question and resolve your support issue enabling you to focus on your job.

TRAINING

Interested in learning how to operate EVS systems and applications or getting more out of our solutions?

Let us show you how. We offer a wide range of courses on how to operate EVS products - from beginner to expert - taught in-house by industry professionals. We also carry out some sessions through a simple web interface, so you can benefit from hands-on instruction - even at a distance. EVS user guides and technical documents are also available free of charge at our website (just click Downloads on our homepage).
