

# PRODUCT SHEET

## IP-BASED LIVE REPLAY AND HIGHLIGHTS SOLUTION

The new LSM-VIA replay and highlights solution offers unprecedented usability, flexibility, speed and control for all your live operations. Designed in close collaboration with our community of EVS operators, LSM-VIA lets you tell the story you want with more functionalities and fewer keystrokes. Working together with the XT-VIA server and relying on EVS' VIA microservices ecosystem, LSM-VIA interacts seamlessly with all other VIA products, opening up exciting new workflows and providing faster and direct access to all the content on the live production network. And with full IP connectivity and software-defined technology onboard, LSM-VIA commits to the latest technologies to ensure you're ready to address all future live production expectations.

### CORE BENEFITS

- 1 | OPERATOR USABILITY**  
Better ergonomics, a new integrated touchscreen, and direct access to functions in a customizable layout allow you to create your replays and highlights with a level of intuitiveness that is second to none.
- 2 | GREATER FLEXIBILITY AND SCALABILITY**  
By interacting seamlessly with other EVS solutions in the VIA microservices ecosystem, LSM-VIA opens up flexible new workflows that adapt perfectly to each production and scale as you need.
- 3 | SPEED UP YOUR OPERATIONS**  
Get access to more functionalities, faster, thanks to the remote's programmable buttons, shortcut functions, simple tactile control and semi-automated functionalities.
- 4 | MORE CONTROL**  
Manage and visualize content through the remote's integrated touchscreen, and a second viewer that acts as an interface to the whole VIA production environment.
- 5 | IP CONNECTIVITY ONBOARD**  
With native IP connectivity, you can assign channels more dynamically for maximum flexibility and connect to any server on the network, benefiting from direct access to content on the network.

### KEY FEATURES

- / Proven reliability and reactivity
- / Multicamera ingest and playback
- / Slow motion and super slow motion replay control
- / Highlight editing tools
- / Seamless integration into VIA ecosystem
- / Full IP connectivity
- / Direct access to network content
- / New functions enabling new workflows
- / Familiar controller design with streamlined ergonomics

## PRODUCT COMPONENTS

### LIVE SLOW MOTION REMOTE CONTROLLER / LSM-VIA REMOTE

- / Streamlined ergonomics
- / Programmable buttons
- / Direct access to functions
- / Intuitive touchscreen panel
- / Customizable layout
- / Semi-automated control

### LIVE PRODUCTION SERVER / XT-VIA

- / Onboard storage for hundreds of hours of content
- / Enhanced channel density with SLSM configurations
- / Native IP support for SMPTE standards (ST 2110, ST 2022, NMOS) and EMBER+
- / Embedded IP Multiviewer with external inputs and tally support
- / Mix of 1080P/UHD4K on one server with upscaling
- / Native codec support like XAVC-I, DNxHR, DNxHD, Prores
- / XNet-VIA 10G EVS network connectivity

### THIN CLIENT FOR VIEWER APPLICATION

- / Mountable anywhere
- / Enrich clip metadata
- / Fast browsing and selection
- / Playlist management and editing

## WHY EVS ?

EVS is globally recognized as the leader in live video technology for broadcast and new media productions. Our passion and purpose are to help our clients craft immersive stories that trigger the best return on emotion. Through a wide range of products and solutions, we help deliver the most gripping live sports images, buzzing entertainment shows and breaking news content to millions of viewers every day – and in real-time.
